

Are your employee's document redaction workloads increasing to achieve data compliance?

DigEplan Redact enables jurisdictions to save significant time while ensuring compliance to in-country legislative requirements, such as GDPR or FOIA. With solutions from partner Especialisten and DigEplan, jurisdictions can remove manual, time-consuming processes with an AI-based automation redaction service that is fully integrated to your permitting system.

Save significant time with fully automated redaction

Ensure efficiency and compliance to legislative requirements when redacting personal and sensitive data with DigEplan and Especialisten's automated redaction services that saves significant time and removes the need for third-party software.

Organizations can reduce redaction workloads, easily anonymize personal details from documents directly from your document management or permitting system of record.

Redacted document is saved into the system of record

Document management and permitting system integration enhances efficiency

DigEplan is fully integrated to all leading permitting or DMS systems, so workflows are triggered directly from the system of record enabling efficiency gains.

Automated redaction workflows

DigEplan and Especialisten's services are triggered from the system of record (DMS or permitting), including the use of smart templates where different document types require subtle changes in the redaction rules for the redaction to be correctly applied.

Reduce the legal requirement workloads for redaction by 90%

Cloud redaction tool

A cloud-based solution, supported by an easy-to-use interface, DigEplan has partnered with GDPR and data experts Espcialisten to optimize the redaction processes.

Save significant time with fully automated redaction

How does automated redaction work?

1. DigEplan is fully integrated into all major Dutch back-office systems, ensuring efficient workflows. Redaction processes are triggered from DigEplan's easy-to-use interface, which includes a rich set of redaction features.

2. Users simply select the redaction service and the redaction workflow template to use the AI-based automated redaction service.

All documents in your system of record are available in DigEplan

Redaction workflow templates ensure accuracy on different document types

3. The redaction services create redaction suggestions reducing manual workloads by 90%, which are then ready for review and final approval. Any additional corrections or additions can be applied by the user.

4. DigEplan includes tools to search, find, and apply additional redaction items, ensuring efficiency and accuracy.

Automated redaction suggestions

Features for review and amendments

5. Redacted records are made available directly to your DMS or permitting system for further processing, such as public record publishing.

Documents are made available in your back-office system

Building efficiency into redaction

By providing integration to back-office systems, utilizing cloud-based workflows, organizations can automate the redaction processes, saving significant wasted hours of manual processing, as well as ensuring compliance to new legislation.
