Enterprise Connected ePlan Management & Review

ProjectDox transforms building safety, engineering, and planning compliance with enhanced ePlan control and management. Whether managing complex crossdepartmental plan reviews on a standalone basis or connected with your permitting system, ProjectDox delivers enterprise-wide jurisdiction process management capabilities. Increase ePlan processes efficiency with ProjectDox's configurable workflows, file and task management, and process insight dashboards and analytics.

Improve efficiency by 60% or more with multi-department engagement

ProjectDox facilitates collaboration through enhanced visibility and communication across departments and with outside agencies, plan reviewers, and applicants. Eliminate time-consuming back-and-forth and swiftly resolve issues and respond to comments.

ProjectDox automatically adds all markups and review comments to the Reviews list for the applicant to respond online or offline, via Excel.

Built-in automation removes unnecessary administration

Built-in automation reduces the administration demands on plan reviewers.

Seamless, efficient document and task management

ProjectDox's file management system, including filtering, status tagging, and review tracking features, enables reviewers to easily navigate and manage the most complex plan reviews. Reviewers are empowered to manage file versions, validate digital certificates, and compare documents across folders and projects.

Coordinators and Reviewers can navigate all drawing pages to check for submission compliance and completeness, making the prescreen process more efficient.

This includes policy checks to ensure compliance with submission standards and correction and comment stamping and auto-assembly. Employees are able to focus on skilled processes, resulting in greater job satisfaction.

Leading plan review tools

Have confidence knowing that ProjectDox offers the plan review tools you'd expect from the ePlan industry leader. Compare and overlay functionality for review cycles enables easy comparison between the markups and the corrections submitted.

Assemble comments and responses in an easy-toview interactive list with comments linked to applicable drawings. Add to that standard comment libraries for efficiency, exporting of comments for reporting and working in teams and electronic stamping for a solid set of tools.

ProjectDox provides step-by-step instructions, including help videos to assist the applicant with their plan submission and corrections.

Configurable processes ensure collaboration and control

ProjectDox offers the flexibility of advanced, configurable workflows for multi-department collaboration, between Building, Planning, Engineering, Public Works, Fire, and other departments.

Maintain control of projects by utilizing features, such as task control and management with automated reminders, optional reviews, pre-designed review templates, configurable milestones for comments and corrections, and deferred submittals to tailor plan reviews to your department processes.

Configurable plan review processes integrate directly and support the permitting workflow process.

Pre-application submission standards

ProjectDox automatically checks every new submission to ensure policy compliance before it is submitted, ensuring that standards are met. Standards are configurable by each jurisdiction with recommendations from Avolve, informed by its industry leading experience.

Options include appropriate sheet size and orientation, digital signatures, file validation, and naming conventions. This removes unnecessary administration and delays and reduces back and forth with applicants due to submission issues.

Bluebeam integration

ProjectDox's advanced markup viewer provides all the tools and features desired by states, counties, and cities in the review of applicant plans. Some jurisdictions, however, may choose to use Bluebeam Revu for this function and ProjectDox provides a robust integration to manage processes, comments, and file management alongside Bluebeam, making increasing review automation and efficiency.

Built-in audit trail

All decisions, tasks, and applicant communication are captured and tracked for easy reporting.

Analytical process insight unlocks additional efficiency gains

Gain vital insights by leveraging dashboards and analytics to understand how your plan review process and staff are performing and to identify opportunities for improvement.

Providing transparency and accountability on processing times, department overloads, efficiency, and workload trends, ProjectDox empowers managers with robust time tracking and reporting features to easily identify and address bottlenecks.

ProjectDox provides extensive reporting and dashboards for real-time analytics of plan review projects and staff performance.

SaaS-based for enhanced security

Choosing a modern software as a service (SaaS) solution removes the maintenance and security risks of on-premise and desktop-based solutions. Our cloud-based technology is managed by experts and continuously monitored, with critical updates and patches applied as required.

ProjectDox provides single sign-on (SSO) with multifactor authentication (MFA) access to increase security and minimize risk, which also ensures that it can be securely accessed from any location.

Engaging, user-friendly applicant experience

ProjectDox's user interface removes friction from the applicant experience, making it easy for applicants to complete the plan review process. Step-by-step instructions and how-to videos, guide applicants on how to use the platform. Intuitive workflows, automated reminders, and clear visibility of application status, optimize the applicant experience.

In addition, ProjectDox makes it easy for reviewers to review and respond to comments, recommendations, and corrections.

ProjectDox's standard integrations and development APIs provide for a seamless applicant experience throughout the plan review process.

Deployment options that suit your jurisdiction

Whether integrated into your jurisdiction's permitting system, or as a standalone or enterprise wide solution, ProjectDox is highly-flexible and configurable to your processes. Implementation is supported by our professional services team or certified partners. We provide extensive training services to ensure a successful implementation and efficient solution for employees and applicants.
